May-Thurner Syndrome: A Case Report and Review of the ...

<https://www.hindawi.com/journals/crivam/2013/740182> ▾

Feb 20, 2013 · May-Thurner syndrome (MTS) has been recognized as a clinical entity for almost six decades. The true incidence rate of MTS is unknown and perhaps ranges from 22 to 32% according to the autopsy studies in the early twentieth century. However, MTS related deep venous thrombosis (DVT) accounts for only 2%-3% of all lower limb DVTs.

<https://europepmc.org/article/MED/33133798> ▾

Oct 25, 2020 · May-Thurner syndrome (MTS) is defined as extrinsic venous compression by the arteries of the ilioacaval system. The most common manifestation of MTS is compression of the left common iliac vein by the right common iliac artery. May-Thurner syndrome is pathologically seen in 2%-5% of patients presenting with symptomatic deep vein thrombosis (DVT).
