SPECIFIC COMMENTS TO AUTHORS

1)Not applicable, as this is more of a comprehensive review 2)This manuscript helps researchers to understand about the MicroRNA's and their role in tumor generation. Also, it details how these microRNA's can be targeted to reduce the cancer burden. It is more of a review, so there are no key problems that this study has solved in particular. 3)No specific limitations are included. This publication will help researchers to increase their knowledge base and explore the therapeutic potential of miRNA's; and help the readers understand the scope of gene therapy. There are some more comments listed out in the checklist word document and those need to be corrected
