SPECIFIC COMMENTS TO AUTHORS

There are many differences between HBV and HCV. For pediatric viral hepatitis, the selection of anti-virus drug is challenged because of many factors. This review show us the success of DAA on HCV and new development of drug concerning with HBV. According to clinic trails in children, more and more anti-virus drugs are accepted and significant benefits of treatment are reported. The author gives us a whole picture about promising anti-virus treatments for pediatric hepatitis B and C chronic infection.
