Oncogenic driver mutations in patients with non-small-cell ...

<https://www.sciencedirect.com/science/article/pii/S0923753419372473>

May 01, 2013 · Non-small-cell lung cancer (NSCLC) represents the major type (~80%) of lung malignancies with a poor 5-year survival rate of ~15%. Multiple genetic and epigenetic aberrations are involved in the development of NSCLC . Of these abnormalities, **oncogenic driver mutations** cause constitutively activated signaling pathways that lead to ...
