

15th of August 2012

Dear Mr. Ling-Ling Wen,

Please find enclosed the edited manuscript! It has been revised as indicated and we provide two revised versions with and without visible changes for your convenience.

Title: Small intestine bleeding due to multifocal angiosarcoma

Author: Luisa Zacarias Föhrding, Arne Macher, Stefan Braunstein, Wolfram Trudo Knoefel, Stefan Andreas Topp

Manuscript No: Ms. wjg/2012/000064

The manuscript has been revised regarding the format to meet the requirements of the journal and in content according to the suggestions of the reviewer:

In detail:

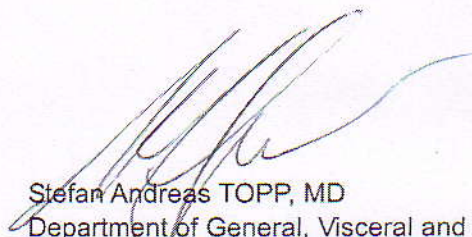

1. The reviewer asked to explain the possible relation of aorto-intestinal fistula to intestine angiosarcoma. In the presented case the aorto-intestinal fistula was hypothesized in a CT scan as the cause of bleeding, but the diagnosis proved to be wrong. We revised the manuscript in order to make this point clearer.
2. The reviewer suggested reviewing the previously reported cases more comprehensively in order to provide intact information to the readers. We thank the reviewer for this helpful remark and amended parts of the discussion accordingly. We hope the manuscript now conveys the information in a more comprehensive and conclusive manner.
3. The format has been updated.
4. Typesetting was corrected. The PMIDs were added to the references.
5. Finally the complete manuscript was revised by "Textcheck"!

We believe the manuscript now meets all requirements and we thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Luisa ZACARIAS FÖHRDING, MD
