

Dear Editor,

Thank you for considering our article as acceptable for World J Clin Cases.

We prepared the corrections, suggestions and requests put forward by the Reviewers and the Science Editor in accordance with the journal's "review" format.

According to this;

1-In Table 1- The "Tissue bacteriology" words were added

2-Figure 3 was removed.

3- We added an informative scheme including HPB surgery related pathologies.

3-Protection section-New diagnostic tools including simulation and navigation systems were added.

4-Treatment/Reconstruction section-Actually the reference related with the four days was just a few line below. But We revised this section and added some discussion.

5-Hepatic artery trauma, indication and external trauma related discussion has been revised and two new figure added.

6-The article was designed as a "**minireview**" as stated by the Science Editor.

7-64065-Figures.ppt file prepared and uploaded.

8-64065-Tables.docs file prepared and uploaded

8- "Copyright License Agreement Form" has been filled and uploaded.

9- "ICMJE Form for Disclosure of Potential Conflicts of Interest" form has been filled and uploaded.

10- Article language has been revised. New arrangements were made in terms of grammar and meaningfulness (Grammarly overall score-93).

My respect.

Prof Osman Nuri Dilek
