#### **SPECIFIC COMMENTS TO AUTHORS**

First of all, current reports of stomach cancer immunotherapy is more, this manuscript for gastric cancer immunotherapy experimental study on the status quo of this summary is comprehensive, and put forward has certain clinical reference value for new ideas and ongoing clinical trials show that the single drug treatment effect is not ideal, the last two years of study and comparative relatively limited data, is also the basic confirmed the desirability of combined treatment effect and advantage, but still need more proof. This paper also proposed the reasons and mechanisms of the high response rate, and proposed the application of ICI in neoadjuvant therapy in the treatment of gastric cancer. Currently, there are still few clinical trials, and further confirmation of this point of view is needed. This manuscript has put forward many unique insights, which will be of great help to the follow-up clinical studies and the treatment of gastric cancer. More data collection and research in this area should be carried out in the future.
