SPECIFIC COMMENTS TO AUTHORS

This submission reported a rare case with cytomegalovirus colitis with segmental colonic hypoganglionosis. Such case is interesting. However, concerns existed: 1. The INTRODUCTION section is same as the words in Abstract. 2. As this patient had an intermittent constipation history. One cannot rule out the possibility of preexisted colonic hypoganglionosis. This should be included in the Discussion. 3. Minor error: The 4th line of the CASE SUMMARY, “polymerase chain action” change to “polymerase chain reaction”.
