SPECIFIC COMMENTS TO AUTHORS

The authors present a classic presentation of a rare entity. This is an excellent article with a clear description of the clinic process, pertinent diagnostic and treatment strategy of idiopathic mesenteric venous sclerosis. The data were reasonably analyzed and interpreted by the authors. The illustrations are relevant and informative, and the conclusion is an effective complement to the etiology of IMP. The manuscript is well written, but further editing and proofreading are needed to maintain the best sense of reading.

SPECIFIC COMMENTS TO AUTHORS

The authors choose to analyze a rare entity and correlate with the uses of a very common herbal preparation. The article describes clearly the diagnostics and treatment strategies and try to correlate the disease with geniposide intake. The images and tables are relevant and informative and the conclusion tries to shed light on the etiology of this rare disease. Editing and proofreading are needed to maintain the best sense of reading
