Pancreatic Schwannoma: A Case Report and an Updated 40 ...<https://pubmed.ncbi.nlm.nih.gov/29241452>

Preoperative diagnosis of pancreatic schwannoma is challenging due to its tendency to mimic other lesions of the pancreas. We describe a case of pancreatic schwannoma and present a review of the cases currently reported in the English literature to identify characteristics of pancreatic schwannoma on imaging. Case presentation: A 53-year-old male presented with a history of intermittent periumbilical ...

A solitary malignant schwannoma mimicking a pancreatic ...<https://pubmed.ncbi.nlm.nih.gov/7170905>

A case is presented in which a cystic process occupying the body and tail of the pancreas preoperatively was regarded as a pancreatic pseudocyst but post-operatively showed a microscopic picture of cystic malignant schwannoma. It is concluded that in case of a presumed pancreatic pseudocyst, preoperative microscopy--when possible--of frozen sections of the cyst wall before performing a drainage operation ...

Schwannoma

Usually Benign Nerve Sheath Tumor

A schwannoma is a usually benign nerve sheath tumor composed of Schwann cells, which normally produce the insulating myelin sheath covering peripheral nerves.

Benign retroperitoneal schwannoma mimicking a pancreatic ...

<https://www.ncbi.nlm.nih.gov/pubmed/9951935>

A rare case of benign retroperitoneal **schwannoma** mimicking a **pancreatic cystic tumor** is reported herein. The **tumor mass**, based on a computed tomography scan and an abdominal echo examination, was initially suspected to be a mucinous cystadenoma or cystadenocarcinoma of the **pancreas**.
