

***Liu et al, “Healthcare practice strategies for integrating personalized medicine: Management of Coronavirus (COVID-19)” (Manuscript Number: 64409)***

Dear Editor,

Thank you for your 11<sup>th</sup> March, 2021 letter with the referee comments. We thank the reviewer and the editor for useful comments and suggestions. We have substantially revised the paper as requested. The important issues raised by the reviewer have been clarified, corrected, and elaborated. We hope the correction of the revised manuscript is satisfactory and met the requirement of *World Journal of Clinical Cases*. Please find the revised manuscript and an outline of reply to the referee. We are happy to make any further change if required.

Yours Sincerely

Tao-Hsin Tung (Corresponding author)

## **Reply to Reviewer #1**

1.The paper that titled "Healthcare practice strategies for integrating personalized medicine: Management of Coronavirus (COVID-19)" has reviewed a convert from traditional treatment to personalized treatment.

**Ans.** Thanks for the reviewer's useful comments.

2.According to the paper title, it is better to focus on COVID-19. A big part of the paper no related to COVID-19. It is related to traditional and personalized treatments in general. It should be curtailed.

**Ans.** Thanks for the reviewer's useful comments. We apologize for the inadequate descriptions. The descriptions have been corrected.

3.Half of references do not relate to COVID-19. Add review study to the paper title.

**Ans.** Thanks for the reviewer's useful comments. We apologize for the inadequate descriptions. The descriptions and references have been corrected.

4. Please insure of "blacks are 3.8x more likely to die of COVID-19 than are their white counterparts"

**Ans.** Thanks for the reviewer's useful comments. We apologize for the inadequate descriptions. The descriptions have been deleted.
