SPECIFIC COMMENTS TO AUTHORS

This is an interesting review of the diagnostic modalities for early chronic pancreatitis. In this review, Ge QC et al described the advantages and limitations of the traditional and latest diagnostic modalities and suggests guidelines for the standardisation of the methods used to diagnose early chronic pancreatitis. The manuscript is very well written. Minor comments: 1. The tables are not well structured, please make an editing. 2. Please divide the last paragraph "DISCUSSION AND CONCLUSION" into two paragraphs.

SPECIFIC COMMENTS TO AUTHORS

This review article is very interesting. The authors reviewed the advantages and limitations of the traditional and latest diagnostic modalities to chronic pancreatitis. It can give a directional guidance to resolve the challenge of diagnosing early chronic pancreatitis. Some minor editing is required before publication.
