Paris, May 3<sup>th</sup>, 2021

Dear Editor,

Thank you for your time and consideration to review the manuscript entitled "**Epigenetic mechanisms of liver tumor resistance to immunotherapy**" by Julie Sanceau and Angélique Gougelet (reference 64652). We warmly thank the positive review of reviewer 1. Concerning the remarks of the science editor: 1) we have accordingly added the author contributions (in red in the revised manuscript), 2) our self-citation represents 0,5% of the reference number, 3) the figures have been made by the two authors with Biorender interface and are thus original figures, 3) we have added the confirmation for the two grants.

We are happy to submit to your consideration a revised version of the manuscript addressing all reviewer comments. We of course remain at your disposition for any further comments, additional data, and modification you may request.

Thank you again for your consideration.

Yours sincerely,

Angélique Gougelet
