SPECIFIC COMMENTS TO AUTHORS

This manuscript is well written on H. pylori and immunity. But how do you envision the readers of this WJG journal ? Helicobacter pylori basic or clinical researcher? General gastroenterologist? It may be easier for the reader to understand if it is made a little more compact.

SPECIFIC COMMENTS TO AUTHORS

In this manuscript, De Brito BB et al. would like to demonstrate the immune response during Hp infection and gastric cancer development. However, several comments need to be mentioned below: 1. The specific innate and adaptive immune responses induced by Hp infection should be further discussed 2. Some new virulence factors of Hp is not involved. 3. The conclusion part should talk more, including the connection between Hp induced immune response and GC, the problem needs to be further studied, and so on. 4. Figure 1 needs to be further optimized and more accurate
