SPECIFIC COMMENTS TO AUTHORS

Dear Authors, Three cases were presented in the article, but CT images of 2 cases were included. If available, please add the CT images of the third case to the article, otherwise state why not in the presentation. In addition, describe the CT findings in detail in the captions so that the reader can better understand the pictures. The article emphasizes the importance of CT findings in such cases, and cross-sectional and 3-dimensional CT images are used in the article. However, it is seen that among the authors, there is no radiologist who produced and reported these images. Please add the radiologist (who contributed to the creation and reporting of these images) among the authors if he / she contributed to the article.
