### **Biostatistics Statement**

**Title:** Adiponectin and the regulation of gastric content volume in the newborn rat

To the Editor,

This letter is to confirm that I have personally conducted all required statistical data analysis utilizing a commercially available software called "Number Cruncher Statistical Software.

I have obtained full training in Statistical Analysis of the data and for studies similar to the one being submitted for publication, I conduct my own statistical assessment.

Should the Reviewers and or Editor have any issues with the performed statistical analysis, I commit to submit the manuscript and data for further analysis by our University Biostatisticians.

Sincerely,

Jaques Belik
