

## PEER-REVIEW REPORT

**Name of journal:** World Journal of Clinical Cases

**Manuscript NO:** 65030

**Title:** A four-year-old anti-N-methyl-D-aspartate receptor encephalitis patient with ovarian teratoma: A case report and literature review

**Reviewer's code:** 01221666

**Position:** Editorial Board

**Academic degree:** MD, PhD

**Professional title:** Associate Professor, Doctor, Surgeon

**Reviewer's Country/Territory:** Taiwan

**Author's Country/Territory:** China

**Manuscript submission date:** 2021-02-27

**Reviewer chosen by:** AI Technique

**Reviewer accepted review:** 2021-02-28 00:13

**Reviewer performed review:** 2021-03-02 04:51

**Review time:** 2 Days and 4 Hours

#### **SPECIFIC COMMENTS TO AUTHORS**

This case report described a young child with ovarian teratoma contributing to anti-N-methyl-D-aspartate receptor encephalitis and treated successfully by laparoscopic ovarian cystectomy. Comments: 1. The title may be changed to better fit the case report. The current title seems to focus on laparoscopic surgery but actually it is a treatment for anti-NMDAR encephalitis. 2. The phrase "The younger the patient is, the less likely a tumour will be present" is present many times. Do you have literature based citation for this statement? It seems even so, clinician need to search for potential teratoma which might provide a cure for encephalitis.
