

## ANSWERING REVIEWERS

December 4, 2013

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 6511-Review.doc).

**Title:** Circulating immune cell activation and diet: a review on human trials

**Author:** Gemma Chiva-Blanch, Ramon Estruch.

**Name of Journal:** *World Journal of Immunology*

**ESPS Manuscript NO:** 6511

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer 02445965:

“The review manuscript by Chiva-Blanch and Estruch is timely and important. Recent studies have emphasized the importance of inflammation in a variety of diseases. Several suggestions are listed. 1) Please comment in the text about the activation of the inflammasome in the diseases. 2) Also, comment on the transition of the macrophages from M1 to M2 and vis-a-versa in the disorders.”

We really appreciate the reviewer's comments. We have commented about the activation of the inflammasome in the diseases in page 4 and 6, and have also commented on the transition of the macrophages from M1 to M2 and vis-a-versa in the disorders in page 4.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Immunology*.

Sincerely yours,

Ramon Estruch, MD, PhD
