

**Re: 65138**

**World Journal of Hepatology**

**Dear Editor and reviewers,**

We thank the editorial board for the comments about our manuscript (65138) entitled "Cytomegalovirus infection in liver-transplanted children". The manuscript has been thoroughly revised according to the reviewer's comments. We look forward to hearing your positive response to this revised manuscript. Below are the answers to the reviewer's comments.

**Response to Reviewer 1**

**Comments: The review article is well written with multiple subheadings. The information in the tables is useful for the readers. Add the dosage of Foscarnet and Cidofovir. Briefly add on combination of intravenous antiviral drugs for multidrug resistance CMV.**

**Answer:**

We sincerely appreciate the reviewer's helpful comments. We added the dosage of Foscarnet and Cidofovir in table 4 and the combination of intravenous foscarnet and ganciclovir in the Ganciclovir-resistant CMV disease subheading already. We have revised and marked by RED in the revised manuscript.

**Response to Science editor:**

5 Issues raised: (1) the authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures

using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor.

**Answer:**

We prepare the original pictures of figure 1 and 2 into PPT file named “65138-Figures.ppt” and table 1-4 into a single word file named “65138-Tables.docx”.

Once again, thank you very much for your comments and suggestions.

Sincerely yours,

Asst Prof. Palittiya Sintusek, MD

Lecturer Division of Gastroenterology and Hepatology
