SPECIFIC COMMENTS TO AUTHORS

The authors drafted well designed manuscript and minor changes are needed for improving the quality of their writing: 1. The authors should follow the CARE Checklist in writing their manuscript. 2. The title should be followed by the words “case report”. 3. In the introduction section, the authors should consider the other strategies that have been reported for the treatment of distal, medium vessel injury and in addition they should summarize why this case is unique. 4. In the discussion section, the authors should describe strengths and limitations in their approach to this case.
