

PEER-REVIEW REPORT

Name of journal: World Journal of Gastrointestinal Oncology

Manuscript NO: 65254

Title: Robotic resection of duodenal gastrointestinal stromal tumour: Preliminary experience from a single centre

Reviewer's code: 02855471

Position: Peer Reviewer

Academic degree: FEBG, MD, PhD

Professional title: Professor, Research Scientist, Senior Scientist

Reviewer's Country/Territory: Germany

Author's Country/Territory: China

Manuscript submission date: 2021-03-11

Reviewer chosen by: AI Technique

Reviewer accepted review: 2021-03-22 13:52

Reviewer performed review: 2021-04-08 00:34

Review time: 16 Days and 10 Hours

SPECIFIC COMMENTS TO AUTHORS

The resection methods of duodenal gastrointestinal stromal tumours include limited resection and pancreatoduodenectomy, which should be determined according to the location of the tumour, the relationship between the tumour and the duodenal papilla, and whether the tumour invades the surrounding tissues. Laparoscopic and robotic resection should be performed according to the location and size of the tumour. In this study, Zhipeng et al analysed the effect of robotic resection and open surgery in the treatment of duodenal gastrointestinal stromal tumours. This study is designed well, and it can provide a reference for scientific and reasonable selection of surgical treatment for duodenal gastrointestinal stromal tumours. The methods are described in detail, and the interesting are very interesting. The selection of the patients is reasonable, and the surgical progress is successful. The results are discussed well, and also the limits of the study are listed and discussed. However, a conclusion is missing in the main text. In my opinion, this study can be accepted for publication after a minor language revision.

SPECIFIC COMMENTS TO AUTHORS

In this study, the authors analysed the effect of robotic resection and open surgery in the treatment of duodenal gastrointestinal stromal tumours. This study is very interesting and provided a well surgery method for duodenal gastrointestinal stromal tumours. Well done.
