# Informed Consent statement

Name of Journal: World Journal of Hepatology

Title of Project: Machine learning models for predicting non-alcoholic fatty liver disease in the general US population: NHANES database

Manuscript Number: 65432

The project uses the publicly available data from the Third National Health and Nutrition Examination Survey (NHANES III), which is conducted by the National Center for Health Statistics (NCHS). In NHANES III, the consent form was signed by participants in the survey.

Best regards,
