SPECIFIC COMMENTS TO AUTHORS

major point I suggest that authors need to add some speculations and/or opinions in discussion not only repeated datas. I think authors add the reasons that they chose the USP15 for gastric cancer progression, proliferation, and invasion, in this study. The relationship between Wnt/b-catenin and USP15 is not clear.

SPECIFIC COMMENTS TO AUTHORS

The authors report the usefulness of USP15 as a prognostic marker for Gastric Cancer. Their research, presentation of findings, and report conforms with international standards. However, the manuscript needs substantive editing. I recommended that the manuscript be accepted subject to the editing of the English language.
