SPECIFIC COMMENTS TO AUTHORS

The author presented a very comprehensive review on SARS-CoV-2 infection in patients with lymphoid malignancies. The manuscript is very fluid and up-to-date, with the association of COVID and lymphoma subtype and treatments. There are a few typos on the manuscript and lack of punctuation, but the overall quality of the manuscript is good.

SPECIFIC COMMENTS TO AUTHORS

There are few articles in the literature on the subject. I think this well-compiled article will contribute to the literature.

SPECIFIC COMMENTS TO AUTHORS

This study provides current and important information for understanding the content. In addition, it is interesting and necessary in view of the scarcity of evaluations on the subject in the current scenario. The article has a satisfactory level of depth and clarity. Moreover, the article is well written. The conclusion should be rewritten with a greater focus on the study's findings and their repercussions.
