#### **SPECIFIC COMMENTS TO AUTHORS**

This mini-review provides a comprehensive description of the researchers' findings of the renin-angiotensin-aldosterone system in mood and suicide. It is a good review article. Based on the current research, the relationship between RAS and suicide cannot be determined. The biomarkers of depression and suicide are a hot spot in the current study. This review provides researchers with a clue.

#### **SPECIFIC COMMENTS TO AUTHORS**

The mood disorders section deals only with depression. Mania does not appear. Schizophrenia should not be included in this section. The suicide section is superficial and lacks analysis.
