SPECIFIC COMMENTS TO AUTHORS

The prognosis of pancreatic cancer is very poor, chemotherapy is an important treatment, drug resistance is a problem that doctors often encounter. This is a very detailed overview, rich in content, clear. I highly appreciate the author's detailed literature review, but the length of the article is too long to be published in journals, and it is more suitable to be published as a book after expansion. If the author wants to publish this article in the journal, please reduce the length as much as possible.

SPECIFIC COMMENTS TO AUTHORS

Manuscript 65602 "Therapeutic Resistance in PDAC: Current Challenges and Future Opportunities" by Jain and Bhardwaj is an excellent review on the underlying causes of therapeutic resistance in PDAC and clinical trials trying to circumvent this resistance. It is very well organized and written and will help young and experienced researchers and clinicians orient themselves in this complex terrain.
