## Screening for Nonalcoholic Fatty Liver Disease in ...

<https://pubmed.ncbi.nlm.nih.gov/29889226>

Background: Inflammatory bowel **disease** (IBD) patients may be at risk **for** nonalcoholic **fatty liver disease** (NAFLD) due to chronic inflammation, hepatotoxic drugs, and alteration of the gut microbiota. Prospective data using accurate diagnostic methods are lacking. Methods: We prospectively investigated prevalence and predictors of NAFLD and **liver** fibrosis by transient elastography (TE) with ...
