Insights into the virologic and immunologic features of SARS-COV-2

Ceylan Polat, Koray Ergunay

Abstract

The host immunity is crucial in determining the clinical course and prognosis of coronavirus disease-2019, where some systemic and severe manifestations are associated with excessive or suboptimal responses. Several antigenic epitopes in spike, nucleocapsid and M proteins of severe acute respiratory syndrome coronavirus 2

Publish Year: 2020

Focusing on **SARS-CoV-2**, we and others have observed that this virus can trigger indeed an immune response that can be dysregulated in severe patients and leading to further injury to multiple organs. The purpose of the review is to bring to light the current...

Although the fatality rate of **SARS-CoV-2** is currently lower than SARS-CoV, the virus seems to be highly contagious based on the number of infected cases to date. In this review, we discuss structure, genom...
