

PEER-REVIEW REPORT

Name of journal: *World Journal of Gastrointestinal Pathophysiology*

Manuscript NO: 65877

Title: Risk assessment of hepatitis E transmission through tissue allografts

Provenance and peer review: Invited manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 03024592

Position: Peer Reviewer

Academic degree: MD

Professional title: Doctor

Reviewer's Country/Territory: Iran

Author's Country/Territory: Spain

Manuscript submission date: 2021-03-17

Reviewer chosen by: Man Liu

Reviewer accepted review: 2021-03-19 14:19

Reviewer performed review: 2021-03-19 14:27

Review time: 1 Hour

SPECIFIC COMMENTS TO AUTHORS

The review “Risk assessment of hepatitis E transmission through tissue allografts” used an information retrieval to collect HEV knowledge on the risk of transmission through cell and tissue allografts. 1, Though no case was found, in my opinion, this topic still remains interesting. 2, Since the title is “Risk assessment of hepatitis E transmission through tissue allografts”, I think review should focus on HEV and tissue allograft (risk, prevention, diagnosis, therapeutic...). The current review describes lot of general knowledge but not tissue allografts. Otherwise, the authors should change the title.
