#### **SPECIFIC COMMENTS TO AUTHORS**

dear authors, this is a nice review paper of cardiac myxomas which can stand for publication after minor revision and corrections. 1) we need to see all figures and the table that you mention in the manuscript, 2) minor lingual correction by a native speaker before it can be accepted as there are mistakes throughout the whole manuscript 3) please include in the references a recent published case from European Heart Journal-case reports about RA myxoma embolization (DOI: 10.1093/ehjcr/ytaa476) and mention these findings in "obstruction" and "embolization" section. 4) in investigation and echocardiography, it is very important to comment on contrast echocardiography for differentiation of myxomas from thrombi and add the proper references. 5) include references in your introduction part. After these corrections we may think of your submission for publication.
