#### **SPECIFIC COMMENTS TO AUTHORS**

Praising authors to write up a review article on AI and colonoscopy, with a lot of original text with appropriate references. However, the writing format / style need to be addressed thoroughly. The abstract / main text has to follow introduction. methods (how review was conducted, what articles were referenced to!, criteria for selection etc ), results and conclusion based on PRISMA checks. They have nicely discussed weak and strong AI. There are few complex statements, that a lay reader may not understand , the delivery can be improved.
