Antenatal corticosteroids for pregnant women with COVID ...<https://pubmed.ncbi.nlm.nih.gov/32429722>

Abstract. Background: While antenatal corticosteroids are routinely used to decrease adverse neonatal outcomes following preterm delivery, corticosteroids are also associated with worse outcomes in patients with viral respiratory infections. Currently in the setting of the COVID-19 pandemic, it is unclear whether antenatal corticosteroids for infant benefit outweigh the potential harm ...

Nov 03, 2020 · Last Updated: November 3, 2020. Patients with severe COVID-19 can develop a systemic inflammatory response that can lead to lung injury and multisystem organ dysfunction. It has been proposed that the potent anti-inflammatory effects of corticosteroids might prevent or mitigate these

Antenatal corticosteroids in COVID-19 perspective

Alex C Vidaeff, Kjersti M Aagaard, Michael A Belfort

Abstract

The aim of this manuscript is to discuss the practice of antenatal corticosteroids administration for fetal maturation in severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) positive pregnant women. Recent high-quality evidence supports the use

[Corticosteroids in the Management of Pregnant Patients ...](#)

<https://pubmed.ncbi.nlm.nih.gov/32769659>

Abstract. Recent evidence supports the use of an early, short course of glucocorticoids in patients with COVID-19 who require mechanical ventilation or oxygen support. As the number of coronavirus disease 2019 (COVID-19) cases continues to increase, the number of pregnant women with the disease is very likely to increase as well.
