

## Case Study: Discovery of Uveal Melanoma Liver Metastasis ...

<https://www.retinalphysician.com/issues/2014/march...> ▾

Case Presentation

Discussion

Conclusion

This case study describes one of the longest reported intervals between **the diagnosis of uveal melanoma** and subsequent discovery of **metastases** to the **liver**. Previous case studies have shown intervals of 10, 15, and even 24 years.<sup>1,2</sup> A chart review undertaken at the University of Texas M.D. Anderson Cancer Center showed that of patients with metastases, 66% metastasized within the first five years, and only 13% metastasized after 10 years or more.<sup>3</sup> Almost 50% of patients with primary uveal m...

### Treatment of Metastatic Uveal (Ocular) Melanoma

<https://www.jefferson.edu/.../metastatic-uveal.html> ▾

The clinical course of patients with uveal melanoma is generally determined by progression of the disease in the liver. Historically, median survival of patients with metastatic uveal melanoma to the liver has been up to 5 months. There are currently no effective systemic chemotherapy regimens for treatment of liver metastases from this tumor.
