

EULAR recommendations for patient education for people ...

<https://ard.bmj.com/content/74/6/954> ▾

Jun 01, 2015 · Objectives The task force aimed to: (1) develop evidence-based recommendations for patient education (PE) for people with inflammatory arthritis, (2) identify the need for further research on PE and (3) determine health professionals' educational needs in order to provide evidence-based PE. Methods A multidisciplinary task force, representing 10 European countries, formulated a definition ...

Early diagnosis (within 6 months of RA symptom onset) coupled with aggressive treatment **reduces the risk of joint damage and disability, helps maintain joint integrity, and enhances productivity and quality of life.** However, with no diagnostic gold standard available, early diagnosis can be challenging. Before development of the antibodies against citrullinated peptides (ACPA) test, rheumatoid factor (RF) was the on...
