

PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 66255

Title: Quetiapine-related acute lung injury: A case report

Provenance and peer review: Unsolicited manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 05823102

Position: Peer Reviewer

Academic degree: PhD

Professional title: Doctor

Reviewer's Country/Territory: Egypt

Author's Country/Territory: China

Manuscript submission date: 2021-03-24

Reviewer chosen by: Ze-Mao Gong

Reviewer accepted review: 2021-09-01 20:34

Reviewer performed review: 2021-09-06 12:16

Review time: 4 Days and 15 Hours

Scientific quality	<input type="checkbox"/> Grade A: Excellent <input checked="" type="checkbox"/> Grade B: Very good <input type="checkbox"/> Grade C: Good <input type="checkbox"/> Grade D: Fair <input type="checkbox"/> Grade E: Do not publish

SPECIFIC COMMENTS TO AUTHORS

This case report raises the possibility that quetiapine is associated with lung injury. The authors did not mention the work-up made (diagnostic tests) to rule out other causes (infectious?). In the discussion, the authors do not turn our attention to previous relevant findings. They should have cited important reports on interstitial lung disease secondary to quetiapine (such as Kim SJ et al. Respiratory Care 2014; 59 (10) e145-e148).
