[Parents' experiences of transition when their infants are ...](https://pubmed.ncbi.nlm.nih.gov/26571288)

<https://pubmed.ncbi.nlm.nih.gov/26571288>

Parents' experiences of transition when their infants are discharged from the Neonatal Intensive Care Unit: a systematic review protocol. Giving birth to a premature or sick infant is a stressful event for parents. The parents' presence and participation in the care of the infant is fundamental to reduce this stress and to provide optimal care for both the premature or sick infant and family.

<https://www.ncbi.nlm.nih.gov/pubmed/?term=31567314>

Implications for practice: Mothers suggested improvements such as additional comforts in private rooms, areas in the NICU where they can meet other mothers, and early information on back-transport. Better recognition and response for mothers without adequate social support would provide much needed emotional assistance.
