Dear Dr Eri,

Thank you for your request. Permission is granted without charge.

The acknowledgement is very important and should state "reproduced/adapted with permission" and give the source journal name - the acknowledgement should either provide full citation details or refer to the relevant citation in the article reference list - the full citation details should include authors, journal, year, volume, issue, and page citation.

Where appearing online or in other electronic media, a link should be provided to the original article (e.g. via DOI).

Development: <https://journals.biologists.com/dev>

We wish you the best of luck with your dissertation.

Kind regards,
Alice

Subject: Permission to publish modified material

Hi

We have used a Table from Tsialikas J, Romer-Seibert J. LIN28: roles and regulation in development and beyond. *Development* 2015; **142**: 2397-2404 for our review manuscript with a slight modification. Can we use it with the journal permission or how can we acknowledge it?

Thanks
REri
