Gastric lymphoma complicated by phlegmonous gastritis ...

<https://journals.lww.com/md-journal/Fulltext/2020/...>

Complications such as severe infection may occur during the **chemotherapy** of malignant lymphoma. PG is a rare yet often fatal acute pyogenic infection. Therefore, early recognition and prompt treatment are vitally important. In this article, we report a rare case of severe PG complicated with **gastric lymphoma** while receiving treatment with **chemotherapy**. Although this case of severe gastric infection resulted in the development ...

Phlegmonous gastritis has been reported in a few patients with hematological malignancies including gastric lymphoma, myeloid sarcoma, multiple myeloma, and **acute leukemia**. [10–13] Several risk factors, including **acute leukemia**, receiving **chemotherapy** including cytotoxic agents and corticosteroids, and being in the neutropenic phase, lead to the immunocompromised status in our patient, which contributed to the onset of phlegmonous gastritis.
