Abstract: **Serum Soluble ST2 as a Novel Inflammatory Marker** in **Acute** Ischemic Stroke by Wei Chen, Ao Lin, Yalan Yu, Lei Zhang, Gui Yang, Hanning Hu, Yi Luo: Background: **Soluble ST2** (sST2) receptor is secreted and detectable in human **serum**, which acts as a decoy receptor for interleukin (IL)-33 to prevent IL-33-mediated Th2 immune responses. Recently, elevated **serum** sST2 has been found to ...

## Serum Soluble ST2 as Diagnostic Marker of Systemic ...

<https://journals.lww.com/pidj/pages/articleviewer...>

Background: Accurate and timely diagnosis of community-acquired bacterial versus viral infections in children with systemic **inflammatory** response syndrome (SIRS) remains challenging both for clinician and laboratory. In the quest of new biochemical **markers** to distinguish bacterial from viral infection, we have explored the possible role of the **soluble** secreted form of **ST2** (sST2).

## Soluble ST2 Has a Prognostic Role in Patients With ...

[europepmc.org/articles/PMC4579100](https://europepmc.org/articles/PMC4579100)

Nov 01, 2015 · **Soluble suppression of tumorigenicity 2** (sST2) has emerged as a **novel** biomarker for heart failure, and **serum** sST2 concentrations could be increased in **inflammatory** diseases. We explored whether sST2 is related to cardiac dysfunction/failure and has a prognostic role in patients with suspected sepsis.
