[Cardiac involvement in Dengue Haemorrhagic Fever](#)

<https://pubmed.ncbi.nlm.nih.gov/9579814>

Acute reversible **cardiac** insult may be noticed in Dengue Haemorrhagic Fever/Dengue Shock Syndrome and could be responsible for **hypotension/shock** seen in some of these patients. Further studies are required to establish the pathogenic mechanisms of cardiac dysfunction in patients with Dengue Haemorrhagic Fever/Dengue Shock Syndrome.

[Spectrum of cardiac involvement in patients with dengue fever](#)

<https://www.sciencedirect.com/science/article/pii/S0167527320338158>

Sep 13, 2020 · The reported incidences of cardiac involvement and myocarditis in dengue infection are varied in different studies. Salgado et al. in a study of 102 patients with DF, found myocarditis in 14%; these patients had dengue hemorrhagic fever (DHF) [6]. Wichmann D, et al. from Sri Lanka reported a 27% incidence of cardiac involvement in DF [12].

Dengue Fever

Medical Condition

A mosquito borne viral disease. This causes high fever, headache and joint pains.

Very rare (Fewer than 20,000 cases per year)

Dengue Fever

Medical Condition

A mosquito borne viral disease. This causes high fever, headahe and joint pains.

 Very rare (Fewer than 20,000 cases per year in US)

 Transmitted through mosquito bites

 May be preventable by vaccine

 Requires lab test or imaging

 Treatable by a medical professional

 Can last several days or weeks

Dengue fever is caused by a virus called Dengue virus which is transmitted by a mosquito species called Aedes especially by A. Aegypti. Sudden onset of high fever, headache especially at the back of the eyes and joint pain are the commonly observed symptoms. Treatment of dengue fever is mainly supportive and depends on the stage of infection

Symptoms

Commonly observed symptoms are as follows:

- Sudden onset of very high fever
- Severe headache usually at the back of eyes
- Muscles and joints becomes painful
- Development of skin rashes
- Fatigue
- Vomiting
- Mild bleeding

Treatments

Treatment of dengue fever is mainly supportive and depends on the stage of infection

Medical procedures: Blood transfusion
