#### **SPECIFIC COMMENTS TO AUTHORS**

I think it is a good article and also novel. Just check a few words in the English translation (patients and x +s) Good article to publish.

#### **SPECIFIC COMMENTS TO AUTHORS**

This study entitled “Retrospective study of whole-body vibration training on balance and walking function in stroke patients.” seems to have been generally well executed and written. Furthermore, I believe that the topic would be very interesting for the readers. I have only a few minor suggestions to improve the quality of the paper. Title Perhaps the title should be rephrased as “Retrospective study of effect of whole-body vibration training on balance and walking function in stroke patients.” Methods Please start this section with an information which type of study that you have performed, when and where. Do not start the sentence with number (e.g., 5, please write five instead of digit number). When the term is mentioned in the text for the first time please write it in the full, not just an abbreviation (e.g., MMSE). Figure 1 Please make Figure 1 according to CONSORT flow diagram.
