SPECIFIC COMMENTS TO AUTHORS

Very interesting topic, which was managed quite well. However, the manuscript needs a lot of language editing.

SPECIFIC COMMENTS TO AUTHORS

Good report. Dissemination of thrombus in the waiting period is the major concern in the treatment approach you opted for this patient. Issues to be addressed in your manuscript are- 1. Authors have not included any image in the manuscript- Preop CT, intra-operative images and follow up images must be included. 2. Manuscript needs language polishing. Please see marked areas (in red) in the file attached.
