SPECIFIC COMMENTS TO AUTHORS

Authors described a case report of Incidentally discovered asymptomatic Splenic Hamartoma misdiagnosed as an aneurysm. It is fascinating to look at these rare cases. It is well written without any grammatical or spelling errors with the adequate evidences to support the findings of this case. Definitely more exposure is needed in these cases to avoid. major pit falls in the diagnosis and management.

SPECIFIC COMMENTS TO AUTHORS

First - the authors concluded that imaging tests are of the little use in the diagnosis of SH

Second - the usefulness of laparoscopic splenectomy for the diagnosis of splenic hamartoma (SH) Third - interesting description of aneurysm misdiagnosis
