SPECIFIC COMMENTS TO AUTHORS

Dear authors, Dear authors, The paper represents the results of the systematic review and meta-analysis focused on comparative efficacy and safety of adenosine and regadenoson for assessment of fractional flow reserve. The article is written with the good English-speaking adduction of the arguments. The article is sufficiently novel and very interesting to warrant publication. All the key elements are presented and described clearly. The most discussable options in the article are: 1) Would you please kindly correct all your typos and grammar errors throughout the manuscript. 2) The objective of the meta-analysis is missing at the end of Introduction. 3) The statistical power must be clearly provided. 4) The bias should be characterized.
