SPECIFIC COMMENTS TO AUTHORS

I SUGGEST TO MAKE THE ABSTRACT MORE COMPLIANT WITH WHAT REPORTED IN THE PAPER; MAKE THE INTRODUCTION MORE PERTINENT TO THE CASE REPORT DESCRIBED. THE STUDY SHOULD BE STRUCTURED IN PRECISE SECTIONS, I.E. INTRODUCTION, CASE REPORT, DISCUSSION: PLEASE, INTEGRATE THE SUB-CHAPTERS INTO THEIR SECTION. REMOVE THE REPETITIVE PARTS IN THE CASE REPORT. REVISION OF THE ENGLISH GRAMMAR IS REQUIRED.

SPECIFIC COMMENTS TO AUTHORS

Huang and co-authors present a case who developed both peripheral T-cell lymphoma, not otherwise specified (PTCL-NOS) and acute myeloid leukemia after treatment of Burkitt lymphoma (BL). The clinical course is quite unique, and accumulation of these case reports will help us better understand the diseases. However, there are several issues to be settled. 1. The authors need to check the clonality of both IGH and TCR rearrangements in the samples of both Burkitt and PTCL-NOS. The analyses can confirm the diagnosis, and evaluate the existence of PTCL-NOS clone in the samples of BL. 2. It is interesting that both BL and PTCL-NOS in the presented case had EBER. It is better to discuss the role of EBV on development of both diseases. It is speculated that common B/T progenitors have EBV in this case. Ideally, southern blotting analysis for EBV will be required. 3. Summary figure will be helpful for the readers to follow the clinical course.

The authors have responded to the comments raised by reviewers. Those changes made the manuscript clearer. There are still a few typos in the manuscript (eg. "reportpresents" in Page 3, line 23, "diarrheaepisodes" in Page 6, line 21 and "perform" in Page 9, line 6) and the authors need to carefully check them.
