Case Control Study

Circulating microRNA 9-3p and serum endocan as potential biomarkers for hepatitis

C virus-related hepatocellular carcinoma

Wahb AMSE *et al.* microRNA 9-3p and endocan in hepatocellular carcinoma

Amany Mohamed Salah Eldin Wahb, Mohamed El Kassas, Ahmed Kamal Khamis,

Mostafa Elhelbawy, Nesreen Elhelbawy, Mona Salah Eldin Habieb

[Serum MicroRNAs as Potential Biomarkers for Early ...](#)

<https://journals.plos.org/plosone/article?id=10.1371/journal.pone.0137706> ▾

Sep 09, 2015 · **Circulating** microRNAs are deregulated in liver fibrosis and **hepatocellular carcinoma** (HCC) and are candidate **biomarkers**. This study investigated the **potential** of **serum** microRNAs; miR-19a, miR-296, miR-130a, miR-195, miR-192, miR-34a, and miR-146a as early diagnostic **biomarkers for hepatitis C virus (HCV)-related** HCC. As how these microRNAs change during liver fibrosis ...
