#### **SPECIFIC COMMENTS TO AUTHORS**

This is an interesting case report regarding Synchronous multiple primary malignancies of the esophagus, stomach, and jejunum. The authors reported the CARE guidelines and respected the methodology. I have the following comments: The introduction should be focused on the main topic. Please delete the sentences regarding the Pubmed Search. The discussion should be shortened. The conclusion is too obvious. A consideration on the clinical implications must be made.

#### **SPECIFIC COMMENTS TO AUTHORS**

1. In "Physical examination upon admission" mentioned "His father died of lung cancer". I think it's a writing error. Please revise. 2. In DISCUSSION, "Our experience indicated the importance of early detection and comprehensive screening in patients with high risk of cancer". In fact, for all malignancies, early detection is crucial, not just multiple malignancies. Regrettably, the author did not discuss or offer the experience in the early detection or risk factors of multiple malignancies through this case. Suggest you rewrite the conclusion.
