SPECIFIC COMMENTS TO AUTHORS

The authors report here an interesting case, that shows a complete withdrawal of medication (oral and inhaled glucocorticoids, inhaled beta2-agonists) after dupilumab therapy in a 54 year old patient with allergic bronchopulmonary aspergillosis. These findings may be very useful for clinicians. The manuscript is clearly written and the case well described. Minor comments: Please add dosages that were used for all medications. I think that the only dosage mentioned is for oral glucocorticoids. Page 3, Line 3: "Aspergillus" instead of "aspergillus" Page 7, Line 3: "fluid" instead of "flu-id" Table 1: There is a reference 12 that is not found in the reference list; is this supposed to be "11" instead?

SPECIFIC COMMENTS TO AUTHORS

This is a very interesting case. It is recommended to provide pathological results and pictures of the bronchial mucosa, which will be more convincing.
