

Reviewer #1:

Specific Comments to Authors: The authors suggested the need for Vit A for the treatment of this case, and importance of vaccination for measles. These are important comments to this article.

Ans: Thank you for your comments.

Reviewer #2:

Specific Comments to Authors: This is a pretty interesting and well written comments on this rare case. They highlight 3 concepts: the treatment of Ganciclovir in CMV infection and/or Measles infection, the relationship between vitamin A deficiency and measles infection and the importance of vitamin A administration to children with measles, as well the necessity of measles vaccination. In general, this paper is tremendously valuable to supplement the information on the diagnosis and treatment in cases with CMV and/or measles infection and is suitable for publication in this journal.

Ans: Thank you for your comments.
