TO WHOM IT MAY CONCERN:

This is to certify that the statistical analysis of the systematic review and meta-analysis of the manuscript entitled: "Safety and efficacy of surgical hip dislocation in managing femoral head fractures: A systematic review and meta-analysis" had been performed and revised by Dr. Ahmed M. Ahmed (drahmedabdou1993@gmail), the integrity and correctness of the analysis were revised by the staff members of the Epidemiology and Public health department.

(N.B.: as the authors are lacking any kind of funding or financial support, the authors could not afford performing this analysis in a private statistical analysis office, instead one of the orthopaedic department members who is certified for performing statistical analysis performed the statistical analysis and the methods and results were revised by the epidemiology and public health staff members who are responsible for checking the statistical method soundness of all the manuscript published from the faculty of medicine.)
